

FURRY FRIENDS CAN'T HANDLE PAPERWORK

SO, WE MADE BILL-PAYING CONTACTLESS

Paws aren't made to sort through paperwork. The new reality of bill-paying is contactless payments made simply, safely and securely through mobile devices. That includes pre-payments, so furry friends can get attention faster. Not ready to go mobile? In-office payments are just as easy, using the latest, "smart" handheld devices.

Liquid Payments is an all-in-one patient payment system that adds the speed and convenience of remote, mobile processing along with traditional office processing. This service is now available to veterinarians to help their pet owners with a contactless method of payment. For in-office payments, your front desk staff can simply use the WiFi, wireless payment terminal, and this information, is also integrated seamlessly with your management system.

The Liquid Payments Solution uses Robotics Processing Automation (RPA), an AI-based technology, to facilitate the automatic posting of payments into the patient's account and can also be utilized to gather data on patient balances owed to facilitate an improved process for capturing payments.

Liquid Payments creates operational efficiencies by enabling integration with any underlying EMR/EHR or practice management system creating an all-in-one solution.

PAYMENT ALERTS

The system notifies the patient of amount due.

CONTACTLESS PAYMENTS

Patient pays quickly and easily from their mobile phone.

STREAMLINED & EFFICIENT

Provider receives payment. Transactions posted instantly.
